SOME OKLAHOMA BOYS.

Outhrie, Okla., Jan. 3 .- Last year board of agriculture did what it rid to aid in the organization of Boys Corp Liubs" and encourage the gressive young Oklahomana to ompete with "father" in growing more and better corn per acre. As means to this end the board through e agronomy department at A. & M. sounds of choice seed norn. Prof. f. offege selected the seed and gay instructions as to its planting, and W D Bentley, superintendent of the United States farm demonstration work in Oklahoma and his staff earn estly comperated with the state work ys in making these various experiments a success. Not all of the boys have reported, but Superintendent Bentley has received and compiled the reports of a large number.

It is interesting to know that a great many of these boys made a great success of their work. A num her of them have won prizes at the various corn shows and fairs that have been held. And in acre yield and profits many of these boys have caused their fathers and neighbors to take notice.

Taking into consideration the un avorable corn weather of the past eason and that the average yield of corn in Oklahoma for 1909 is only 14.4 hushels per acre, the yield report ed by many of these boys is some thing to be proud of the same being from 40 to 68 bushels per acre.

It is true these boys had only imall acreage—one 5 acres, one 5 acres, and the rest of them one acre or less but what can be done on a small acreage can, with equal profit, be done on a larger acreage.

The reason a girl wants to marry a man is she wouldn't if she knew what was best for her.

Danderine works wonders. It produces hair just as surely as rain and sunshine raises crops. It produces a thick growth of luxuriant hair when all other remedies fail. We guarantee Danderine.
